In the trend towards a “Nike and Dell” approach to banking, Financial Institutions are revisiting their portfolio of business and operational activities to focus on those areas that they can best leverage for value creation. The pressure is particularly strong on areas such as securities processing where scale, specialization, flexibility and market harmonization play an important role.

From cost reduction to strategic advantage, Offshoring can’t be ignored. As per practice matures, the challenge for financial institutions is to optimize their burgeoning offshored operations.

The participation fee is 35 € for members and 45 € for guests.

In case of your participation please return the registration form or send an e-mail to ibf@pt.lu.

Best regards,
